

OSHA Audits and Compliance

MSSC safety consultants will perform an audit at your facility to look at your OSHA documentation compliance, including:

- OSHA Form 300 record keeping
- chemical list and MSDS updating
- written safety programs
- safety committee meetings reports
- employee safety training records
- disciplinary action implementation.

We will thoroughly examine your facility for OSHA / fire safety violations. The inspection may include:

- machine guarding
- electrical issues
- hazardous chemical labeling
- proper storage and grounding / bonding of flammable / combustible liquids
- fire extinguishers
- eye wash stations
- pallet/lighting / ladder issues
- stair and loft storage construction issues
- rag usage and disposal issues
- emergency lighting
- exits
- first aid kit issues
- compressed cylinders / tanks
- compressed air usage
- hazardous waste capture / storage and labeling
- air quality, and many other issues.

After the audit is completed, MSSC will conduct an executive review with management and your safety program administrator to present our findings and recommendations so that you will know what you need to implement at your facility to improve the safety of your workplace and to attain 100% OSHA / Fire Safety compliance.

The Montana Safety Services Council (MSSC) is a not-for-profit educational association established in 1993 to provide safety and health related services to its members and the community.

MSSC currently serves approximately 130 businesses in all areas of service throughout Montana and Wyoming.
